PRODUCT DATA

PD 120

AQUARIGHT P 07 WT

DESCRIPTION AND USE

AQUARIGHT P 07 WT is a polyphosphate based product which has been formulated for use in commercial and domestic potable water systems.

GENERAL SPECIFICATION

Appearance : Colorless, Clear liquid
Specific gravity : 1.09
pH as supplied : 9.26

TREATMENT AND DOSAGE REQUIREMENTS

AQUARIGHT P 07 WT is dosed to achieve a phosphate level within set limits in the water. The correct treatment depend upon the water condition.

AQUARIGHT P 07 WT should be dosed continuously using a metering pump to reach a phosphate level at 3 – 5 ppm in the water. The optimum treatment level will be specified by PT ZEFA VALINDO JAYA.

PRODUCT BENEFITS

AQUARIGHT P 07 WT can be injected direct in to the water system either neat or diluted.

Threshold reaction will provide effective protection from scale deposition and corrosion.

The unsightly condition of “red water” can also be avoided by such treatment.

Consistent dosage of AQUARIGHT P 07 WT can extend the life of domestic water pipe work.
