WE TREAT IT RIGHT

PRODUCT DATA

PD 129

AQUARIGHT RR 117

DESCRIPTION AND USE

AQUARIGHT RR 117 is an alkaline blend of cleaning chemical. It is formulated for the chemical cleaning of systems contaminated with organic and inorganic materials.

GENERAL SPECIFICATION

Appearance : Greenish
Odor : Ammonical
Specific Gravity : 1.1
pH : 13.5

TREATMENT AND DOSAGE REQUIREMENTS

AQUARIGHT RR 117 is sprayed onto the metal parts or added to the water system and allowed to soak in, washed off or drain. The contact time will depend on the level of contamination.

AQUARIGHT RR 117 normally used at the rate of 0.1 to 0.5% V/V of water in the system for pre commission cleaning and lightly fouled systems. It should be dosed at the rate of 2% V/V of water in the system for heavily fouled systems.

AQUARIGHT RR 117 is strongly alkaline and should not be used in the systems containing aluminium or other non-ferrous metals unless an appropriate inhibitor is added in conjunction with RR 117.

PRODUCT BENEFITS

Effective heavy cleaner for multi purpose use

Quick acting cleaner for industrial oven cleaning

Degreaser and emulsifier

Easy to apply
